1/5 - Central tendency, box-and-whisker graphs

Numbers that give you the general idea

- **Mean** — average (add all #'s then divide by how many there were)
outliers throw off the data
- **Median** — middle of an ordered list
- **Mode** — the answer that occurs the most
non-numerical data

Which would be the best measure of central tendency?

Shoe size of
every student
in class

Seperate by gender → mean

Distance from
home to school

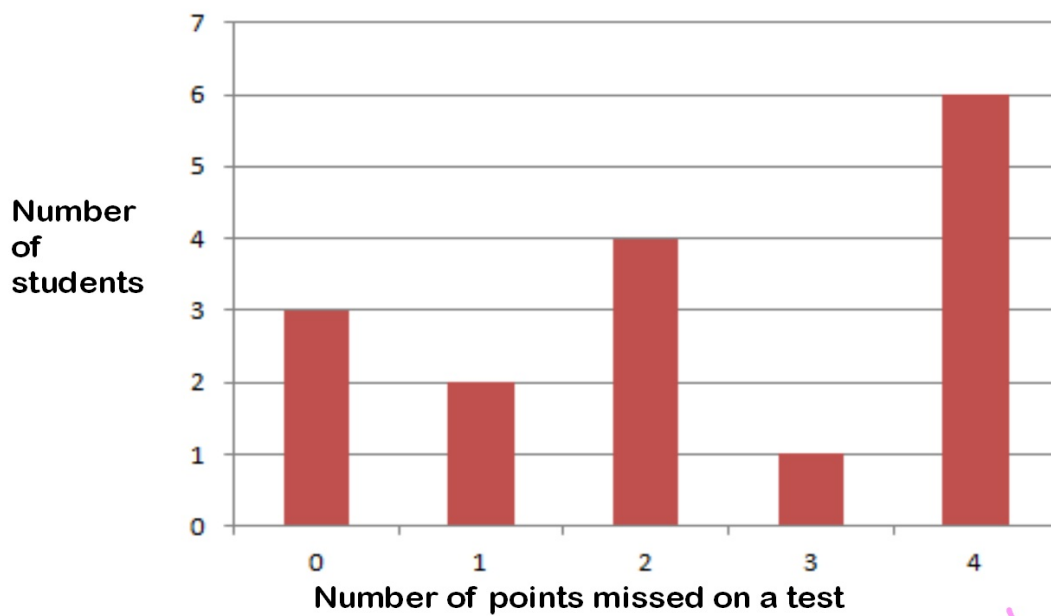

Median
(could be outliers)

Points of improvement
from Test1 to Test2

median
(could be outliers)

Favorite color

Mode

What is the *mean* number of points missed?

16 total people

2.3125

Create a box-and-whisker graphs for:

One company's income in thousands of dollars

Month	Sales	Month	Sales
Jan	22	July	9
Feb	18	Aug	11
Mar	7	Sept	18
Apr	15	Oct	15
May	12	Nov	20
June	8	Dec	25
