Circle graphs due tomorrow... get out your notes

5/15 - Histograms

Red Journal - page 193

1 ACTIVITY: Analyzing Distributions

Work with a partner. The graphs (histograms) show four different types of distributions.

- Describe a real-life example of each distribution.
- Describe the mean, median, and mode of each distribution.
Handwritten red notes: "average" above "mean", "most" above "mode", and "middle" below "median".
- In which distributions are the mean and median about equal? Explain your reasoning.
- How did each type of distribution get its name?

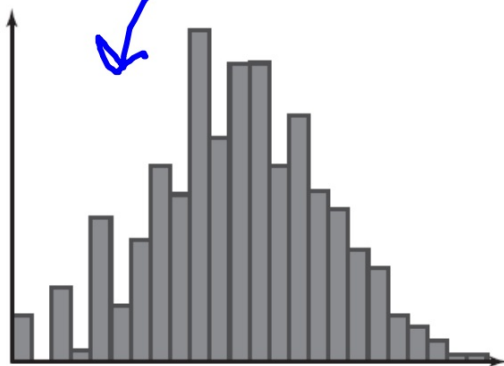

2**ACTIVITY:** Analyzing Distributions**Red Journal - page 194**

Work with a partner. A survey asked 100 adult men and 100 adult women to answer the following questions.

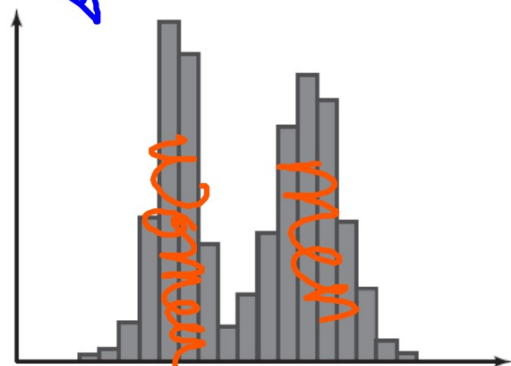

Question 1: What is your ideal weight?

Question 2: What is your ideal age?

Match the histogram to the question.

Graph for Question 2

Graph for Question 1

Why?

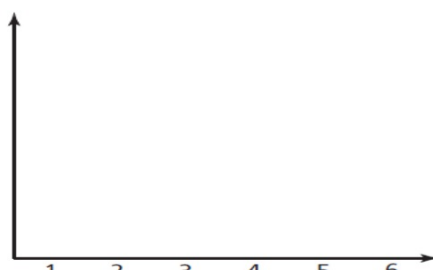

3 ACTIVITY: Conducting Experiments

Work with a partner. Conduct two experiments. Make a frequency table and a histogram for each experiment. Compare and contrast the results of the two experiments.

- a. Toss *one* number cube 36 times. Record the numbers.

Frequency Table

Histogram

page 194

- b. Toss *two* number cubes 36 times. Record the sums of the two numbers.
